

SOUTH FEATHER WATER & POWER

TO: Board of Directors
FROM: Michael Glaze, General Manager
DATE: September 7, 2006
RE: End of Irrigation Season
Agenda Item for 9/26/06 Board of Directors Meeting

It is time to establish the date that the irrigation season will end so that planned maintenance projects may begin.

Ditch-operations personnel have consulted with Yuba County Water District and with crop irrigators regarding their irrigation needs for the remainder of the season. Their recommendation is that the season end on October 13.

If October 13 is the end-of-season date approved by the Board, customers on the Forbestown Ditch will receive water for 19 days from the end of the billing cycle in September until that date. Our policy has been that, if water is available for more than half of a monthly billing cycle, the monthly service charge will be applied.

The following action is requested:

"I move that the 2006 irrigation season end on October 13, 2006, with the monthly service charge of \$17.50 applied to all accounts whose service ends on that date."
